

KEY FEATURES

- Tapered and ribbed side walls for tight secure fit
- Easy installation and removal
- Maintains shape in extreme environments
- Cost-effective solution for temporary sealing

Poly Plug[™]
Temporary Plugs

The Poly Plug snap-in design protects exposed conduits and innerducts with ease

The Poly Plug[™] is designed to seal standard ducts, innerducts or terminators from the damaging and expensive effects of weather, job site debris, and animal incursion.

The tapered fit ensures an easy and snug installation, while the scalloped ridges create a snap-in seal to prevent accidental dislodging of the plug. The base of the plug features a sturdy flanged lip to easily remove the plug. All Poly Plugs have a designed-in rope-tie making mule tape or other line easy to tie-off and readily at-hand for future use.

Molded from Low Density Polyethylene (LDPE), a semi-pliable, high-impact, and chemically inert resin that has near-zero moisture absorption properties. LDPE is resistant to ultraviolet light, ozone, and is capable of withstanding extreme fluctuations in temperature.
