CASE STUDY

## HORSE STABLES

DIAMONDGRID™

### RIDING FOR THE DISABLED MURWILLUMBAH

#### THE PROBLEM

The Murwillumbah RDA had some issues with their horse stables becoming very swampy from some underground springs, creating very muddy horse stables. With the RDA being a charity, they were looking for a cost effective solution to stable flooring.

#### THE SOLUTION

- ◆ Geo Fabric was laid over the muddy surface
- ◆ 4 inches of sand was then spread over the fabric and levelled.
- ◆ Diamond Grid laid.
- ◆ Sand filled into grids and also an extra 3 inches over the top of the grids for the horses to stand and lay on.
