

Product Data Sheet

SureFlow Sand™

Description

SureFlow Sand is a proprietary drilling fluid additive blended by DrilRite-Chem LLC for use in sand, gravel, and rock formations. When added to a bentonite slurry, it exhibits unparalleled gel strength, fluid loss prevention, and flow properties. This product has been field tested with 100% satisfaction by multiple HDD companies in multiple applications throughout the U.S. This product is non-hazardous to the environment.

Mixing

SureFlow Sand is conveniently pre-mixed and packaged for use with 500-gallon, 750-gallon, or 1000-gallon mix tanks. This allows for minimal drilling fluid mixing knowledge, labor, and waste. Simply add 1-3 bags of bentonite per 500 gallons of water, depending on type of bentonite and ground conditions. Then add the appropriate sized SureFlow Sand container to the mix tank.

Typical Physical Properties

Form: white/ off white powder

Specific Gravity: 0.9

PH: in water 10-10.5

Solubility: Highly Dispersible
